

Hoek's Sustainable box

The new box design look and feel, as well as the new material (100% recycled polyester). The boxes are to be folded for collection before the next delivery (box pick up). The customer will see the box tally on the order confirmation email and invoice, with a notification/reminder to prepare the boxes for collection.

How to fold & return the re-usable box.

1. Place both hands on the inside flaps of the box and pull them a little bit up (so they will 'unlock').

2. Fold both sides at the same time towards the air holes as seen in the diagram below.

3. Fold it all the way down.

4. Make sure both sides are folded the same and the box is flat.

5. Bundle the boxes in to packs of 5 with the bottoms and top and tape them together with florist tape (or rope). Do not use the thick/plastic tape.

6. Make sure both sides are folded the same and the box is flat.

7. Do the exact same with the pink lid of the box
